Storage for every space and purpose

## Stands on its own

There is nothing to drill into the wall and it is strong enough to hold whatever you're storing. The possibilities are endless!

elfa® is introducing elfa® freestanding. A revolutionary new addition to the best-selling system. Add elfa® accessories and elfa® décor wood elements to create a space that is one-of-a-kind, just for you.

elfa® freestanding allows you to create an island of organization, right in the middle of your walk-in closet, in front of a wall or window or wherever you need storage!

Innovative. Sophisticated. Customized. Life Changing.

**Easy to plan.** The elfa® freestanding storage concept is built in of sections of fixed measurements. Every section is 607 mm. This offers you the possibility to easily create a functional storage solution practically anywhere. No tools are needed. Just click all the components in place!

## New possibilities

Whatever the backdrop elfa® freestanding provides a stunning display. Because it is not attached to a wall and can go where wall-mounted solutions can not. If you can not drill into your walls, elfa® freestanding is thoughtfully designed to hold all of your storage needs without missing a beat. And you can choose to add elfa® décor wood components if you would like a more warm “furniture like” feeling to your storage solution.

### **In front of a window**

Instant storage where you need it. elfa® freestanding works anywhere you need it to - even in front of a window. Assembly is breeze and you can add sections for a larger storage solution.

## Beneath a window

**A storage solution that grows with your needs.** Start with a few sections and build on more when needed. An elfa® system is simple to modify or extend.

**An organization solution that works overtime.** Now it is easier than ever to create instant, effortless storage wherever it's needed. Add it beneath a row of windows or in the office to hold periodicals, paperwork and equipment - it's strong enough to do it all. Shelves are adjustable so you can rearrange your solution as your storage needs change.

In front of a sloping wall

**Long or short - wide or narrow.** The uprights are available in two heights and the shelves in three different depths.

**Out-of-the-way storage in a snap.** Spare rooms and unique ceiling slopes are no match for the versatility of elfa® freestanding. It is quick and easy to assemble wherever it is needed, for whatever purpose. You can choose to include shelf, hanging and drawer space to customize your solution.

## Doublesided solutions

elfa® freestanding is right at home and in the office to create a workstation/room divider combo that is smart, functional and stunning. This solution offers ample room for storage of periodicals, documents and computer components. Our new elfa® décor shelves create a work surface that is just perfect for writing, planning and organizing. And, with easy assembly, your office will be running like a top in no time.

**Foot-extension.** Levelers on the bottom of each foot allow you to adjust your solution to accommodate uneven floors and baseboards of varying heights. Add optional foot height extenders to work with higher baseboards.

### Colours

The epoxy-coated steel components in the elfa® system are robust and durable. They last for generations and are available in the colours of white or platinum. A warm feeling of solid wood combined with the sleek lines of steel interior makes the feeling and look exclusive. Wood details are available in birch, walnut stained birch and white.

**Double or single.** The elfa® freestanding storage solution can either be single or double which is both smart and functional.

## Works in conjunction with all other elfa® products

Thoughtfully designed so you can store more. No tools are needed for the installation of elfa® freestanding, you just click all the components in place. elfa® freestanding works with all elfa® products and therefore maximizes your storage potential.

The intelligent elfa® system is designed to make all parts complement each other, enhancing the overall functionality and experience.

### Accessories

Empower your storage with smart and functional accessories that help transform chaotic clutter into peaceful order.
