

Everything relies on the top track

If we would ever consider changing the name of this product it would be called "hero". This is the basic product that makes Elfa so flexible. And it's super easy to install. Fasten the top track on the wall with only a few holes. All other components are then simply hung on it!

Wall Hang with white Classic.

WEIGHT RECOMMENDATIONS - a guide for wall hang solutions

For you to feel comfortable with that your Elfa system is strong enough for your storage needs, we have created a weight recommendation guide to support you.

Important to know and to take into account is that these recommendations are based on that your wall is without defects. It is your responsibility to secure the condition of the wall and that it can withstand the load that will be applied.

These recommendations also requires that you use our assembly instruction how to attach the toprack.

Also use our recommended screws and plugs for your wall type.

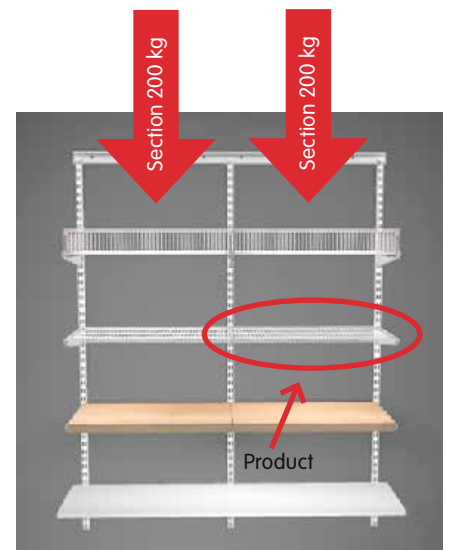

NOTE! All our recommendations are based on that you place your storage evenly on the product that you load.

See our assembly instruction for top track and wall band at www.elfa.com.

An Elfa wall hang solution is based on sections.

A section is the area created between two hang standards.

NOTE! Each section is designed to hold 200 kg load.

Make sure not to overload each product and to place your load evenly. Find each product maximum load on the next page.

We recommend that you place the hang standard 5 cm from the end of the top track.

How heavy are my things?

- 10 pair of jeans approx. 8 kg
- 40 porcelain plates approx. 20 kg
- A Microwave oven approx. 10 kg
- A 40 inch flat screen TV approx. 15 kg
